JOURNAL OF APPLIED GEOPHYSICS — Volume 31 — No. 1–4

Special Issue

GEOPHYSICS AND ENVIRONMENT

International Symposium held 14, 15 and 16 April 1993 at the University of Lausanne, Switzerland

Edited by

D. CHAPELLIER

Institute of Geophysics, BFSH2, 1015 Dorignynto, Lausanne, Switzerland

D. FITTERMAN

US Geological Survey, DFC Box 25046 MS964, Denver, CO 80225, USA

C. MEYER DE STADELHOFEN

Institute of Geophysics, BFSH2, 1015 Dorignynto, Lausanne, Switzerland

D.S. PARASNIS

Department of Applied Geophysics, Luleå University of Technology, 971 87 Luleå, Sweden

D.W. STEEPLES

Geology Department, University of Kansas, Lawrence, KS 66047, USA

and

P. VALLA

BGRM, B.P. 6009, 45090 Orleans, France

CONTENTS

Preface vii
Application of the electrostatic quadripole to sounding in the hectometric depth range
Y. Benderitter, A. Jolivet, A. Mounir and A. Tabbagh 1
AMT measurements compared with gravimetry and magnetometry for structural study of a sedimentary basin: Letlhakeng–Botlhapatlou groundwater project, Botswana
B. Bourgeois, F. Mathieu, C. Vachette and P. Vaubourg 7
Application of the integrated NMR–TDEM method in groundwater exploration in Israel
M. Goldman, B. Rabinovich, M. Rabinovich, D. Gilad, I. Gev and M. Schirov 27
Geophysical methods in drinkwater protection of near-surface reservoirs
P. Draskovits and I. Fejes 53

Applications of shallow high-resolution seismic reflection to various environmental problems
R.D. Miller and D.W. Steeples 65
Utilisation de la radio-magnétotellurique pour la reconnaissance en site aquatique
A. Hollier-Larousse, R. Lagabrielle and J.P. Levillain 73
Study of the Santa Catarina aquifer system (Mexico Basin) using magnetotelluric soundings
M. Chouteau, S. Krivochieva, R.R. Castillo, T.G. Moran and V. Jouanne 85
Geophysical survey as a basis for regeneration of waste dump Halde 10, Zwickau, Saxony
M. Kobr and I. Linhart 107
Hydraulic borehole characterization through the application of moment methods to fluid conductivity logs
S. Löw, V. Kelley and S. Vomvoris 117
Hydrogeological investigation of porous environments by radio magnetotelluric-resistivity (RMT-R 12–240 kHz)
P. Turberg, I. Müller and F. Flury 133
Numerical simulation of radon transport from subsurface to buildings
T. Kohl, F. Medici and L. Rybach 145
Measurements of indoor radon concentrations and assessment of radiation exposure
F. Medici and L. Rybach 153
Simulation d'une pollution sur un champ captant aupres d'un fleuve—suivi dans l'espace et dans le temps a partir d'un traceur NaCl à l'aide d'une méthode électrique
F. Lantier 165
Ground-probing radar as a tool for heterogeneity estimation in gravel deposits: advances in data-processing and facies analysis
P. Huggenberger, E. Meier and A. Pugin 171
Détection des cavités à l'aide de mesures électriques et du géoradar dans une galerie d'amenée d'eau
P. Holub and T. Dumitrescu 185
Application du géoradar á la localisation de cavités, de nids de gravier et de zones karstiques
A. Robert and C. De Bosset 197
The acoustic emission from rock under stress and hydraulic pressure
H. Marcak 205
Contribution of the 3-D visualization of acoustic borehole signals (full waveforms) to a quick formation evaluation
A. Rousseau and D. Jeantet 213
How to predict rock temperatures for deep Alpine tunnels
L. Rybach and M. Pfister 261
Contributions to a shallow aquifer study by reprocessed seismic sections from petroleum exploration surveys, eastern Abu Dhabi, United Arab Emirates
D. Woodward 271
